Providing Specialized Nursing
& Advanced Pulmonary Care

Weekly Family-Guardian Communication

...from the Interdisciplinary Care Team – 2/26/2021

In our effort to maintain open and honest communication, we will continue to provide you with updates about all Respiratory Viral Outbreaks and the Novel Coronavirus (COVID-19). We hope you find this information helpful.

Resident Update

Several of our Residents have been diagnosed with the Rhinovirus and Enterovirus. The viruses are common upper respiratory viruses that circulate in the community this time of year. Symptoms can include fever, runny nose, wheezing, vomiting and diarrhea. Nursing has contacted all of our Resident Family-Guardians directly if their child has tested positive for the viruses. Please be reassured we are in contact with the NJ DOH and taking all necessary steps to control the spread of this virus. An outbreak has been declared by the NJ DOH.

Staff Update

We have no new cases of COVID-19 with our Staff Members. Our last positive Staff case was on 2/9.

Resident/Staff COVID-19 Testing

Following The NJ DOH guidance, this will be the last week of our outbreak testing for Residents if we have no new positive Staff cases. We remain in an outbreak status. This outbreak will be declared over on 3/10 if we have no new positive Staff cases. Routine weekly testing of all Staff will continue until further direction from The NJ DOH.

Visitation

Family-Guardian indoor visitation per NJ DOH Executive Directive 20-025 specific to Pediatric and Residents of Adult Long Term Care Facilities with Developmental Disabilities is delayed. We must be COVID-19 free for 28 days and no longer conducting outbreak testing (details explained in Phased Reopening section). Outdoor Visitation is no longer being scheduled due to the cold weather. Video Visitation continues to be available via Skype, Zoom or FaceTime. We encourage you to contact your VPF Social Worker to help arrange this.

Children's Hospitals & Related Institutions

Phased Reopening

The NJ DOH recently revised Executive Directive No. 20-026, which establishes mandatory procedures that Long Term Care facilities must meet in order to safely reopen to ALL visitors and resume normal operations. The phased reopening follows the NJ State Reopening Plan and is based on the following criteria: the rate of community transmission of COVID-19, a Facility's outbreak status and ability to test Staff/Residents, maintain Core Infection Prevention and Control Practices, have appropriate Staffing and Personnel Protective Equipment (PPE). When facilities are COVID-19 free for 14 days AND no longer conducting outbreak testing, they may restore services in phases, starting with indoor visitation for Resident Family-Guardians. Strict guidelines must be followed in all phases outlined in the Executive Directive to ensure a safe reopening. Since we are conducting Resident outbreak testing, Family/Guardian indoor visitation is delayed until further notice. We received good news from the NJ DOH that VPF is in a County where the rate of community transmission and outbreaks is decreasing. If this continues, socially distanced indoor visitation by appointment will be allowed. Further guidance from The NJ DOH will be issued soon. A limited, special circumstance indoor visitation defined as "Compassionate Care Visitation" is also included in this Directive following strict guidelines during all phases of a Facility's reopening. For VPF, indoor visitation will be considered for newly admitted Residents and Residents and their Family-Guardians experiencing extreme emotional distress. Our Medical Staff, Director of Nursing, Nurse Managers/Supervisors and Social Workers coordinate this specialized visitation scheduled by appointment only on a limited basis. Indoor visitation for End of Life Care is an exception in this Directive and will be supported as needed at any time. Please contact your VPF Social Worker for more information. As a friendly reminder, Family-Guardians can now launder their child's clothing and linens. Please contact your VPF Social Worker or Nursing Supervisor if interested.

COVID-19 Vaccine

We hosted our third Vaccine Clinic onsite February 24 partnering with Walgreens Pharmacy with great success! This vaccine is not mandatory to receive although highly recommended for all individuals to prevent the spread of COVID-19 especially for individuals with chronic health issues and for all health care workers. Our Residents age 16 and older with Family-Guardian permission have received the vaccine along our Staff. The vaccine is now available at various sites in the community. A NJ State toll free Hotline can be contacted at 855-568-0545 to assist NJ Residents with general questions about the vaccines, eligibility and location of vaccination sites or visit the NJ Hub Website: [covid19.nj.gov](https://www.covid19.nj.gov).

Our Commitment

Resident and Staff wellness and safety is our top priority. Please be reassured we continue to follow all core standards of Infection Prevention and Control measures partnering with the NJ DOH to maintain wellness. Our commitment is verified again during another unannounced visit, an Infection Prevention and Control focused Survey on 11/13 by the NJ DOH. We are happy to report that we are in full compliance with all of the federal and state rules, guidelines and standards of care specific to Infection Prevention and Control.

Our Appreciation

The strength and courage our Family-Guardians continue to demonstrate as we all work through this pandemic is heroic. A heartfelt thank you for your continued patience, support and trust in us.

Important Reminder: Flu Season

We encourage our Family-Guardians to receive a yearly flu vaccine to help keep us all well especially during the COVID-19 pandemic. It is not too late! The State of NJ requires all individuals employed in any NJ Healthcare Facility receive a yearly flu vaccine unless they have a medical exemption from a healthcare provider. We are in the process of providing the vaccine to our Staff. All of our Residents with Family-Guardian permission have received the flu vaccine.

Be well.
