Weekly Family-Guardian Communication

...from the Interdisciplinary Care Team – 4/23/2021

In our effort to maintain open and honest communication, we will continue to provide you with updates about all Respiratory Viral Outbreaks and the Novel Coronavirus (COVID-19). We hope you find this information helpful.

Resident Update

We have one Resident that tested positive for COVID-19 via our weekly testing. Our Resident is not showing any signs or symptoms of illness and as a precaution was transferred to the Hospital for close monitoring. The Resident was cared for by a Staff Member that was not showing any signs or symptoms of illness but tested positive for COVID-19.

Staff Update

We have one direct care Staff Member that has tested positive for COVID-19. The Staff Member has been out of the building so none of our Residents or Staff are affected by this.

Resident/Staff COVID-19 Testing

Following The NJ DOH guidance, Resident outbreak testing continues one time per week. Staff testing is twice per week due to the high rate of the virus in the community. This will continue until further direction from The NJ DOH.

Visitation

Family-Guardian indoor visitation per NJ DOH Executive Directive 20-025 specific to Pediatric and Residents of Adult Long Term Care Facilities with Developmental Disabilities is delayed. We must be COVID-19 free for 28 days and no longer conducting outbreak testing (details explained in Phased Reopening section). To honor our Residents and Families, we hosted a staffed special Outdoor Compassionate Care visitation 4/4 and 4/18 with great success. We hope to continue to schedule more in the very near future. Video Visitation continues to be available via Skype, Zoom or FaceTime. We encourage you to contact your VPF Social Worker to help arrange this.

Phased Reopening

The NJ DOH issued Executive Directive No. 20-026 establishing mandatory procedures that Long Term Care facilities must have in place in order to safely reopen to ALL visitors and resume normal operations. This includes Family visitation. The Directive follows mandates from the Center of Medicare and Medicaid (CMS) and guidance from the Center of Disease Control (CDC) and the NJ State Reopening Plan. It is based on the following: the rate of community transmission of COVID-19, a Facility's outbreak status and ability to test Staff/Residents, maintain core Infection Prevention and Control Practices, have adequate Staffing and Personal Protective Equipment (PPE). When facilities are COVID-19 free AND no longer outbreak testing, facilities may restore services in phases such as indoor visitation for Resident Family-Guardians. Strict guidelines must be followed in all phases outlined in the Directive to ensure a safe reopening. Since we are conducting Resident outbreak testing and have had positive cases this type of Family-Guardian indoor visitation is delayed until further notice. There are exceptions to indoor visitation defined in this Directive. The following exception, special circumstance indoor visitation is permitted following strict infection control guidelines and is defined as "Compassionate Care Visitation". This type of visitation is available for **ALL** of our Families by appointment on a limited basis. We are sensitive to the extreme duress and stress the separation has caused our Residents, who are children, and to their Families. Please contact your VPF Social Worker for more information about visitation.

Recently, the NJ DOH issued an Amendment to this Directive concerning indoor visitation and vaccination. We are in the process of reviewing the information and promise to notify you as soon as we can with an update. We thank you for your support and understanding. We respect and appreciate how difficult this is for our Families.

COVID-19 Vaccine

We hosted three Vaccine Clinics onsite partnering with Walgreens Pharmacy for our Residents and Staff with great success! Although the vaccine is not mandatory to receive it is highly recommended for all individuals to prevent the spread of COVID-19 especially those with chronic health issues and all health care workers. The vaccine will continue to be made available to our Staff and Residents. The next onsite clinic will be scheduled in the near future. The vaccine is now available at various sites in the community for all NJ Residents. A NJ State toll free Hotline can be contacted at 855-568-0545 to assist you with general questions about the vaccines, eligibility and location of vaccination sites or you can visit the NJ Hub Website: [covid19.nj.gov](https://www.covid19.nj.gov).

Our Commitment

Resident and Staff wellness and safety is our top priority. Please be reassured we continue to follow all core standards of Infection Prevention and Control measures partnering with the NJ DOH to maintain wellness. Our commitment is verified again during another unannounced visit, an Infection Prevention and Control focused Survey on 11/13 by the NJ DOH. We are happy to report that we are in full compliance with all of the federal and state rules, guidelines and standards of care specific to Infection Prevention and Control.

Our Appreciation

The strength and courage our Family-Guardians continue to demonstrate as we all work through this pandemic is heroic. A heartfelt thank you for your continued patience, support and trust in us. We respect and appreciate our partnership with you.

Important Reminder

We encourage our Family-Guardians to receive a yearly flu vaccine to help keep us all well especially during the COVID-19 pandemic. It is not too late! The State of NJ requires all individuals employed in any NJ Healthcare Facility receive a yearly flu vaccine unless they have a medical exemption from a healthcare provider. All of our eligible Staff and Residents have received the flu vaccine.

Be well.
